SENIOR PRODUCT ENGINEER | REACT / TYPESCRIPT

Senior product-minded frontend engineer with 10+ years of experience building React and TypeScript products, from complex EdTech workflows and interactive browser experiences to shared UI foundations, AI-assisted features, and payment flows. I have owned features from unclear requirements through implementation, testing, and release, working closely with product, design, backend, and QA. My strongest area is frontend architecture and complex product UI, but I can also cross into backend code when needed.

CORE SKILLS

- TypeScript, React, JavaScript, Next.js,
 - Node.js, GraphQL, REST APIs, PostgreSQL,
 - TanStack Query, Zustand, Storybook, Testing,
 - Product Ownership, Design Systems, Performance, Claude Code / Codex
-

PROFESSIONAL EXPERIENCE

Senior Frontend Developer @ Twee (Israel)

Aug 2024 - May 2026

- Owned React and TypeScript workflows for an AI-assisted EdTech platform, working with product and design from incomplete requirements through release.
- Built lesson and classroom tools, admin and analytics flows, shared components, and Stripe features.
- When work crossed the stack, I changed ASP.NET/C# backend code, shaped API behavior with backend engineers, and handled the UI states needed for reliable production use.

Senior Frontend Developer @ Bylith (Israel)

Mar 2023 - Aug 2024

- Built the company's UI kit from scratch and owned the component library end to end.
- Shipped reusable components with clear states, variants, and responsive behavior.
- Improved accessibility, mobile behavior, and edge-case handling across the design system.
- Kept patterns documented so product teams could move faster.

Senior Frontend Developer @ Sberbank (Russia)

Feb 2021 - Mar 2023

- Built teacher-facing task constructors and student learning flows for widget-based EdTech exercises.
- Worked on the move from a monorepo setup toward microfrontends.
- Supported answer storage, scoring, and review flows for completed tasks.
- Reused widget patterns across products used by thousands of teachers and students.

Frontend Developer @ FUTURECOMES (Russia)

Apr 2020 - Feb 2021

- With a team of developers, built a React and Redux-based in-browser game with complex animation, gamified interaction flows, sound, and video effects.
- Implemented stateful, API-driven screens and responsive UI.
- Set up reusable frontend structure that made new learning activities easier to add.

Frontend Developer @ Freelance / Netrika / RoyalMark (Russia)

2015 - 2020

- Delivered frontend and full-stack projects, including CMS and PHP development under tight deadlines.
 - Built responsive UI, API integrations, and production fixes and releases.
 - Worked directly with clients and teams from first draft to launch.
-
