SENIOR FRONTEND / PRODUCT ENGINEER | REACT | TYPESCRIPT

PROFESSIONAL SUMMARY

Senior product-minded frontend engineer with 10+ years of experience building React and TypeScript products, including complex EdTech workflows, interactive browser experiences, shared UI foundations, AI-assisted features, and payment flows. Owns features from ambiguous requirements through implementation, testing, and release in close collaboration with product, design, backend, and QA. Strongest in frontend architecture and complex product UI, with the ability to contribute to backend code when needed.

CORE SKILLS

- Frontend: TypeScript, React, JavaScript, Next.js, responsive UI
- Data and APIs: TanStack Query, Zustand, GraphQL, REST APIs, PostgreSQL
- Engineering: Node.js, Storybook, testing, performance, accessibility
- Product delivery: product ownership, design systems, API-driven workflows, Claude Code / Codex

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Twee (Israel) | Aug 2024 - Mar 2026

- Delivered a wide range of React and TypeScript features for an AI-assisted EdTech platform, spanning lesson creation, classroom tools, admin and analytics interfaces, and payments, from early requirements through testing and release.
- Independently built the frontend for a multi-step school subscription checkout, integrating plan configuration, quote and invoice downloads, and Stripe payments.
- Built interactive teaching tools, including a CEFR analysis interface with proficiency visualizations and a gap-fill editor with text selection and editable gaps.
- Developed shared UI components and contributed ASP.NET/C# backend changes, working with product, design, and backend engineers on feature behavior and API requirements.

Senior Frontend Developer | Bylith (Israel) | Mar 2023 - Aug 2024

- Built and owned a 30+ component UI kit from scratch for CRM interfaces used in multinational retail operations, covering theme mapping, component implementation, and documentation.
- Implemented theming and accessible interactions across the library, with particular attention to keyboard navigation and operation.
- Developed complex controls including date, time, and color pickers, nested checklists, and multi-handle range sliders.

Senior Frontend Developer | Sberbank (Russia) | Feb 2021 – Mar 2023

- Built teacher-facing task constructors and student learning flows for widget-based EdTech exercises.
- Contributed to the move from a monorepo setup toward microfrontends.
- Supported answer storage, scoring, and review flows and reused widget patterns across products used by thousands of teachers and students.

Frontend Developer | FUTURECOMES (Russia) | Apr 2020 – Feb 2021

- Built a React and Redux in-browser game with complex animation, gamified interaction flows, sound, and video effects as part of a development team.
- Implemented stateful, API-driven screens and responsive UI.
- Established reusable frontend structure that made new learning activities easier to add.

Frontend Developer | Freelance / Netrika / RoyalMark (Russia) | 2015 – 2020

- Delivered frontend and full-stack projects, including CMS and PHP development under tight deadlines.
- Built responsive UI, API integrations, production fixes, and releases.
- Worked directly with clients and teams from first draft to launch.

EDUCATION

Bachelor of Computer Science — Herzen State University of St. Petersburg, Russia

LANGUAGES

English — C1 / full professional proficiency | Russian — native
