SENIOR FRONTEND / FULLSTACK ENGINEER

Senior frontend-focused engineer with 10+ years building React and TypeScript products, design systems, and interactive EdTech tools. I turn product ideas into reliable interfaces: complex UI, shared components, API-heavy flows, and the cleanup that keeps a codebase usable. I use AI coding tools in my workflow for exploration, refactoring, debugging, and speeding up repetitive implementation work without replacing engineering judgment.

CORE SKILLS

React	Design Systems	GraphQL	Testing
TypeScript	UI Kits	Effector	Performance
JavaScript	Storybook	REST APIs	Backend basics
Next.js	SCSS	Accessibility	AI-assisted development

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer @ Twee (Israel)

Aug 2024 - Present

- Built interactive lesson and classroom tools in React/TypeScript for mobile and desktop flows.
- Worked across React/TypeScript frontend and ASP.NET/C# backend code for product features.
- Shipped AI, admin, analytics, and Stripe flows across the product.
- Kept shared components documented so the team could reuse them safely.

Senior Frontend Engineer @ Bylith (Israel)

Mar 2023 - Aug 2024

- Built shared UI-kit foundations and reusable patterns for product teams.
- Shipped reusable UI components with consistent states, variants, and responsive behavior.
- Improved accessibility, mobile behavior, and edge-case handling across the component library.
- Documented patterns and usage so teams could avoid duplicated UI work.

Frontend Engineer @ Sberbank (Russia)

Feb 2021 - Mar 2023

- Built teacher task constructors and student learning modes for widget-based EdTech exercises.
- Worked on migration from a monorepo setup toward microfrontends architecture.
- Supported answer storage, scoring, and review flows for completed student tasks.
- Reused widget patterns across flows used by thousands of teachers and students.

Frontend Engineer @ FUTURECOMES (Russia)

Apr 2020 - Feb 2021

- Built a React/Redux EdTech SPA from scratch with game-like interactive flows.
- Implemented stateful exercises, API-driven screens, and responsive UI.
- Set reusable frontend structure for new learning activities.

Frontend Engineer @ Older roles

2015 - 2020

- Delivered 20+ frontend and full-stack projects, including CMS and PHP/CodeIgniter work.
 - Built responsive UI, API integrations, and production fixes/releases.
 - Worked directly with clients and teams from first draft to launch.
-
